Mentored Summer Research Awards

The goal of the Arkansas INBRE Program is to expand and strengthen the biomedical research infrastructure in Arkansas by developing a multidisciplinary research network.

WHAT ARE THE PROGRAM DETAILS?

- A 10-week mentored summer research program at one of the three INBRE lead institutions
  - University of Arkansas for Medical Sciences (UAMS)
  - University of Arkansas at Fayetteville (UAF)
  - University of Arkansas at Little Rock (UALR)
- Awards in both biomedical and bioinformatics research are offered
- Students planning to pursue graduate work in biomedical research or bioinformatics will be given preference
- Each award includes a summer salary, as well as research supplies and travel allowances along with university privileges for the participants at each campus
- Students will attend weekly seminars and complete training in ethical research conduct
- Students who attend a national/regional scientific meeting to present their summer research work in the academic-year following their participation in the program will receive a travel award

WHO CAN APPLY?

- Undergraduate STEM (Science, Technology, Engineering and Mathematics) students; rising juniors and seniors will have priority
- Students from traditionally underrepresented groups in science are strongly encouraged to apply

HOW TO APPLY?

For more information and to apply online: [http://brin.uams.edu/students2.asp](http://brin.uams.edu/students2.asp)

Applications must include: a complete application form, a copy of the applicant's transcript(s) and faculty recommendation letters from the applicant's home institution.
